Unanswered	Question 2	0 / 1 pts
	Which of these terms refers specifically to the ability to focus on one stimulus among the many the our environment?	nat are in
	 sensory perception 	
Correct Answer	O attentional process	
	memory retrieval	

	O language process	
Unanswered	Question 3	0 / 1 pts
	Cognitive psychologists who focus on the role of consciousness in human thought processe how much we have in our behaviors.	es want to know
	O repetitiveness	
	 social dysfunction 	
	O ability	
Correct Answer	O conscious choice	
L		
Unanswered	Question 4	0 / 1 pts
	The process of being aware of one's own cognitive abilities and processes is known as	
	O decision making	
	O language acquisition	
Correct Answer	O metacognition	
	attention	
Unanswered	Question 5	0 / 1 pts
	Cognitive psychology is broad and thus overlaps with many other fields including biological philosophy, and	psychology,
	O chemistry	
	O astronomy	
Correct Answer	o social psychology	
	Orobotics	
Unanswered	Question 6	0 / 1 pts
	Cognitive psychology has been a field of study	
	o since the 1950s	

1		
	O since the 1920s	
	O for over 100 years	
Correct Answer	O for thousands of years	
Unanswered	Question 7	0 / 1 pts
	Ancient scholars in which field asked the first questions related to cognitive psychology?	
	O behaviorism	
	Osociology	
	Obiology	
Correct Answer	Ophilosophy	
Unanswered	Question 8	0 / 1 pts
	Fechner contributed to the early work in cognitive psychology by conducting studies on	
		_ - -
Correct Answer	psychophysics	
	auditory processing	
	O nerve conduction	
	Ointrospection	
L		
Unanswered	Question 9	0 / 1 pts
	Who was one of the first psychologists to study cognition?	
	O John Watson	
Correct Answer	O Wilhelm Wundt	
	O B. F. Skinner	
	O Sigmund Freud	
Unanswered	Question 10	0 / 1 pts
	Which psychologist extensively tested his own memory to develop theories of cognition?	

	O Aristotle	
	O Wundt	
Correct Answer	O Ebbinghaus	
	Chomsky	
Unanswered	Question 11	0 / 1 pts
	Which psychologist mapped out the "forgetting curve" that is still used in cognitive psychology	today?
	O Aristotle	
	O Wundt	
Correct Answer	O Ebbinghaus	
	O Chomsky	
L		
Unanswered	Question 12	0 / 1 pts
	Which group of scholars wanted to study consciousness as it occurs?	
	O behaviorists	
	Ophilosophers	
Correct Answer	O introspectionists	
	Opsychophysicists	
L		
Unanswered	Question 13	0 / 1 pts
	Who were the most prominent researchers in Europe while the behaviorists were prevalent in States?	the United
Correct Answer	Cognitive psychologists	
	 representationalists 	
	Gestalt psychologists	
	Opsycholinguists	
I		

Unanswered Question 14 0 / 1 pts

	Who invented the term "cognitive psychology"?	
	O Noam Chomsky	
	O Sigmund Freud	
	O Wilhelm Wundt	
Correct Answer	O Ulric Neisser	
Unanswered	Question 15) / 1 pts
	In early representationalist models, information was thought to be stored as a series of	
	O words	
	O numbers	
Correct Answer	O symbols	
	Ocognitions	
Unanswered	Question 16) / 1 pts
	The is an approach to gaining knowledge that relies on observations of phenomena and al tests of hypotheses about these phenomena.	lows for
		lows for
	tests of hypotheses about these phenomena.	lows for
Correct Answer	tests of hypotheses about these phenomena. orepresentationalist approach obiological perspective	lows for
Correct Answer	tests of hypotheses about these phenomena. O representationalist approach O biological perspective	lows for
Correct Answer	tests of hypotheses about these phenomena. representationalist approach biological perspective scientific method	lows for
Correct Answer Unanswered	tests of hypotheses about these phenomena. representationalist approach biological perspective scientific method embodied cognition approach	lows for
	tests of hypotheses about these phenomena. representationalist approach biological perspective scientific method embodied cognition approach	
	tests of hypotheses about these phenomena. representationalist approach biological perspective scientific method embodied cognition approach Question 17

Unanswered	Question 18	0 / 1 pts
	Within a research study, the behavior of interest is represented by the	
Correct Answer	O dependent variable	
	O independent variable	
	Ohypothesis	
	O research question	
Unanswered	Question 19	0 / 1 pts
	The dependent variable is also known as the variable.	
Correct Answer	O response	
	O explanatory	
	Ocomplex	
	Osecond	
Unanswered	Question 20	0 / 1 pts
	The independent variable is also known as the variable.	
	O response	
Correct Answer	O explanatory	
	Ocomplex	
	Osecond	
L		
Unanswered	Question 21	0 / 1 pts

	A set of variables and how they are believed to relate to one another is known as a(n)	
	O independent variable	
	O dependent variable	
Correct Answe	theory	
	O hypothesis	
Unanswered	Question 22	0 / 1 pts
	Testable propositions derived from theories are known as	
	independent variables	
	O dependent variables	
	O research questions	
Correct Answe	o hypotheses	
Unanswered	Question 23	0 / 1 pts
	A(n) study is designed to simplify the contexts surrounding the behavior of interest,	
	focused investigation of the impact of a relatively small set of variables.	allowing for
		allowing for
	focused investigation of the impact of a relatively small set of variables.	allowing for
	focused investigation of the impact of a relatively small set of variables. O correlational	allowing for
Correct Answe	focused investigation of the impact of a relatively small set of variables. correlational survey case	allowing for
Correct Answe	focused investigation of the impact of a relatively small set of variables. Correlational Survey Case	allowing for
Correct Answe Unanswered	focused investigation of the impact of a relatively small set of variables. Correlational Survey Case	allowing for
	focused investigation of the impact of a relatively small set of variables. correlational	0 / 1 pts
	focused investigation of the impact of a relatively small set of variables. correlational	0 / 1 pts
	focused investigation of the impact of a relatively small set of variables. Correlational	0 / 1 pts
	focused investigation of the impact of a relatively small set of variables. correlational	0 / 1 pts

Unanswered	Question 25	0 / 1 pts
	A factorial design is one that includes more than one	
Correct Answe	independent variable	
	O control variable	
	O participant	
	O dependent variable	
Unanswered	Question 26	0 / 1 pts
	The ability to generalize study results to a broader context is known as	
	O drawing causal inferences	
Correct Answe	er external validity	
	O quasi-experimentation	
	manipulating the independent variable	
Unanswered	Question 27	0 / 1 pts
	A quasi-independent variable is one that cannot be	
Correct Answe	o manipulated	
	O measured	
	O validated	
	O externalized	
Unanswered	Question 28	0 / 1 pts

	Which of these is a way that cognitive researchers measure mental processing?	
	O pulse rate	
	 breathing rate 	
Correct Answer	type of memory errors	
	speed of hand movements	
Unanswered	Question 29	0 / 1 pts
	Question 29	
	Which German physiologist studied the speed of neuronal transmission by attaching electrical leg muscles of frogs?	I wires to the
Correct Answer	O Herman von Helmholtz	
	O B. F. Skinner	
	O Ulric Neisser	
	O Wilhelm Wundt	
Unanswered		0 / 1 pts
	Question 30	0 / 1 pto
	Neuroscience, linguistics, attention, and perception are all part of the study of cognitive psych	ology.
Correct Answer	O True	
	O False	
Unanswered	Overtion 24	0 / 1 pts
	Question 31	0 / 1 pts
	Wilhelm Wundt coined the term "cognitive psychology" and is considered the father of this fiel	d.
	O True	
Correct Answer	O False	
Unanswered	Overtion 20	0 / 1 pts
-onanswereu	Question 32	στιρισ
	The independent variable is the factor in an experiment that the researcher manipulates.	
		I I

	O False	
Ĺ		
Unanswered	Question 33	0 / 1 pts
	The dependent variable is the factor that a researcher believes influences the behavior of inte	rest.
	O True	
Correct Answer	O False	
Unanswered	Question 34	0 / 1 pts
	Question 34	o / i pts
	Dr. Aksoy believes that overt, observable actions are the only valid way that we can study peo-	ople. She is a
	O sociologist	
Correct Answer	O behaviorist	
	O neuroscientist	
	Obiologist	
Unanswered	Question 35	0 / 1 pts
	Dr. Chen asserts that knowledge about the world is depicted in our minds such that cognitive can operate on those depictions. He is a(n)	processes
Correct Answer	O representationalist	
	O biological perspectivist	
	O behavioralist	
	 embodied cognitionist 	
Unanswered	Question 36	0 / 1 pts
	Imagine a psychology professor says, "Our cognitive processes exist mainly to provide a meaninteracting with the world around us." Which approach to cognitive psychology is this?	ns of
Correct Answer	embodied cognition	

	O behaviorist	
	O biological determinist	
Unanswered	Question 37	0 / 1 pts
	Dr. Martinez performed a study in which participants in one group studied for an exam by principles in their textbook, and the other group studied by reading the chapters over and students act out the principles most closely illustrates the	_
Correct Answe	er embodied cognition approach	
	O biological perspective	
	representationalist approach	
	O cognitive-behavioral approach	
Unanswered	Question 38	0 / 1 pts
	Adante went to the bank, where he encountered a very rude bank teller. Rather than getting being rude back, Adante was polite through the encounter while thinking, "This person must through a difficult time for her to be so rude, so I shouldn't take it personally." Adante's attinillustrates	st be going

Unanswered	Question 51	0 / 1 pts
	The study of cognition fell out of favor because of the rise in popularity of	
	Ophilosophy	
	O neuroscience	
Correct Answer	O behaviorism	
	○ sociology	
Unanswered	Question 52	0 / 1 pts
	What did behaviorists claim was the problem with introspection?	
Correct Answer	It was biased by the participant's perspective.	
	Introspection was too complex for anyone to accurately complete.	
	It was too statistically simplistic.	
	Only medical doctors could walk participants through the process.	
Unanswered	Question 53	0 / 1 pts
	Behaviorists primarily studied behaviors that	
Correct Answer	o could be observed directly	
	were reflected using neuroimaging techniques	
	O were quantifiable	
	ould be traced back to a distinct memory process	
Unanswered	Question 54	0 / 1 pts

	A belief in cognitive psychology reemerged following which event?	
	A belief in cognitive psychology reemerged following which event:	
	a series of experiments showing how learning is affected by behavioral conditioning	
	O John Watson's experimentation on Little Albert	
	Sigmund Freud's discussion of the psychosexual stages of development	
Correct Answer	the development of information processing approaches to study the mind and behavior	
L		
Unanswered	Question 55	0 / 1 pts
	Skinner believed that language was learned as a result of	
Correct Answer	O operant conditioning	
	Opsychophysics	
	O genetics	
	classical conditioning	
Unanswered	Question 56	0 / 1 pts
	Ulric Neisser was interested in cognition within	
	Oschools	
	Occupations	
Correct Answer	everyday behaviors	
	 stressful contexts 	
Unanswered	Question 57	0 / 1 pts
_	Which of these is an advantage of behaviorism?	
	It encourages self-reporting by research participants, who share their thoughts and feelings with scients.	itists.
Correct Answer	Its research focuses on identifiable, visible actions and does not rely on participants' descriptions or impressions.	
	It proves that language abilities result from cognitive processes inherent to humans.	
	Its dual focus allows researchers to study overt behaviors and the processes behind them.	

Unanswered	Question 58	0 / 1 pts
	If you think of cognitive processing as a type of information processing, then the brain is the the cognitive processes themselves are the	and
Correct Answer	O hardware; software	
	O response; stimulus	
	O software; hardware	
	O stimulus; response	
Unanswered	Question 59	0 / 1 pts
	Using a computer or information-processing model would most accurately depict which approac cognition?	ch to
	O embodied	
	O behaviorist	
Correct Answer	O representationalist	
	Olinguistic	
Unanswered	Question 60	0 / 1 pts
	How are the on/off signals in a computer similar to the way the brain operates?	
	Information cannot be retrieved that is not first adequately encoded.	
Correct Answer	The neurons in the brain either fire or they do not.	
	The brain organizes information as either important or not important.	
	O Active information in the brain is easily recalled, but inactive information is not.	
Unanswered	Question 61	0 / 1 pts
	Which perspective on cognition does the representationalist approach best connect with?	
Correct Answer	O biological	
	O developmental	
	O social	

	Oclinical	
Unanswered	Question 62	0 / 1 pts
	According to the embodied cognition approach, which of the following influence(s) our cognition	n?
	O neurotransmitters	
orrect Answer	o interactions with people	
	O genetics	
	O nutrition	
Jnanswered	Question 63	0 / 1 pts
	Some investigators are interested in how cognition is associated with brain activity. This intere represents the	st
	embodied cognition approach	
	O cognitive-behavioral approach	
	representationalist approach	
orrect Answer	o biological perspective	
Jnanswered	Question 64	0 / 1 pts
	Researchers use to study the way in which neurons are linked in networks in the brain understand how different cognitive processes work.	and to
	O brain activity	
orrect Answei	connectionist models	
	O behavior indications	
	O language structures	
Jnanswered	Question 65	0 / 1 pts
	If competing theories explain the same amount of data, which one should be selected as prefe	erable?
	the most complicated one	

	O the most mathematical one	
Correct Answer	the least complex one	
	the least testable one	
-		
Unanswered	Question 66	0 / 1 pts
	What research methodology focuses on intensive analyses of a single individual?	
	O surveys	
Correct Answer	O case studies	
	 correlational studies 	
	naturalistic observations	
Unanswered	Question 67	0 / 1 pts
	Often, case studies focus upon people who are	
	 willing to participate in research 	
Correct Answer	outside the norm in some way	
	unaware that they are being studied	
	specially trained to follow research protocols	
Unanswered	Question 68	0 / 1 pts
	Why did so many researchers make one individual, Henry Molaison, the subject of their resea	rch?
	O He was unusually insightful in how he described his thought processes, so he became the focus of mastudies.	ny case
	Molaison had incredibly fast reflexes, which made him one of a kind.	
	O He was so neurotypical in his responses that scientists could study just him instead of hundreds of oth	er people.
Correct Answer	Molaison had an unusual illness that caused him to undergo risky surgery, so there were few other subhim.	ojects like

nanswered	Question 69	0 / 1 pts
	Which of the following is a disadvantage of the case study methodology?	
	It involves complicated statistical analyses.	
rrect Answer	The conclusions are difficult to generalize.	
	O Correlation is not causation.	
	O It cannot be used to build theory.	
nanswered	Question 70	0 / 1 pts
	Which of these is essential to every correlational study?	
	the ability to focus on just one variable	
rrect Answer	a group of participants to study	
	the chance to collect responses with maximal impact on the variable of interest	
	a single participant who will agree to in-depth testing	
nanswered	Question 71	0 / 1 pts
nanswered		
nanswered	Question 71 If researchers are interested in studying how multiple variables relate to each other, which researchers are interested in studying how multiple variables.	
	Question 71 If researchers are interested in studying how multiple variables relate to each other, which rapproach would they likely use?	
	Question 71 If researchers are interested in studying how multiple variables relate to each other, which rapproach would they likely use?	
	Question 71 If researchers are interested in studying how multiple variables relate to each other, which rapproach would they likely use?	
	Question 71 If researchers are interested in studying how multiple variables relate to each other, which rapproach would they likely use? a correlational study an experimental study a case study	esearch
errect Answer	Question 71 If researchers are interested in studying how multiple variables relate to each other, which rapproach would they likely use? a correlational study an experimental study a case study an independent variable	0 / 1 pts esearch 0 / 1 pts
errect Answer	Question 71 If researchers are interested in studying how multiple variables relate to each other, which rapproach would they likely use? a correlational study an experimental study an independent variable Question 72	esearch
errect Answer	Question 71 If researchers are interested in studying how multiple variables relate to each other, which rapproach would they likely use? a correlational study an experimental study an independent variable Question 72 Within a correlational study, how many variables can be studied at once?	esearch

O many

Unanswered	Question 73	0 / 1 pts
	How much impact do researchers have upon the variables within a correlational study?	
	O none	
Correct Answer	O as little as possible	
	maximal impact, but only on the independent variable	
	maximal impact, but only on the dependent variable	
Unanswered	Question 74	0 / 1 pts
	Cause and effect generalizations	
	are often the result of case studies	
Correct Answer	should not be drawn from correlational studies	
	should not be drawn from experimental studies	
	○ can be established from any study type	
Unanswered	Question 75	0 / 1 pts
	Why do experiments include control variables?	
	so causality can be assessed	
Correct Answer	to ensure the only difference between groups is the independent variable	
	to make the data analysis more straightforward	
	so the study is more likely to be published	
Unanswered	Question 76	0 / 1 pts
	Including more than one independent variable in a study allows researchers to see how var	ables
Correct Answer	O interact	
	cancel one another out	
	can be measured more accurately	

	influence the participants similarly	
Unanswered	Question 77	0 / 1 pts
	The biggest advantage of experimental design is	
	 straightforward statistical analyses 	
	the in depth look at a single participant	
Correct Answer	the ability to make causal inferences	
	O high external validity	
Unanswered	Question 78	0 / 1 pts
	Helmholtz's studies established that neuronal transmission is the speed light travels.	
Correct Answer	substantially slower than	
	O much quicker than	
	about the same as	
	O variable as compared to	
Unanswered	Question 79	0 / 1 pts
	In the 1930s, Frederic Bartlett discovered that could contribute to memory distortion.	
	 sophisticated comparisons 	
	 short reaction times 	
	O metaphors	
Correct Answer	O stereotypes	
Unanswered	Question 80	0 / 1 pts
	A researcher is interested in studying how people memorize lists of associated words. The most appropriate dependent variable for an experiment like this would be	
Correct Answer	O percentage correct	

	O response time	
	O eye tracking	
	O response duration	
Jnanswered	Question 81	0 / 1 pts
	The usual assessment within a typical priming study involves an assessment of how long it to participants to	akes
orrect Answer	respond to a target stimuli based on type of prime	
	O decide whether a string of letters is a word	
	O decide whether the prime is related to the target word	
	make accurate judgments when distracted	
Unanswered	Question 82	0 / 1 pts
	Using priming logic, people would respond most quickly to the word "apple" after which of the primes? O apply	e following
orrect Answer	O grapple O teacher	
	O application	
Jnanswered	Question 83	0 / 1 pts
	Why do many scientists measure eye movement as a way of understanding cognition?	
	O It is impossible to monitor activity within a living brain, but eye movement helps scientists understand memory.	visual
orrect Answer	O It is likely that if we look at something for at least a few seconds, then we are mentally processing det that person or thing.	ails about
	Many scientists believe that the sooner a person looks away from something, the more time they ded processing information about it.	icate to
	Eye movements lead to corresponding behaviors in the olfactory and auditory sense systems.	

	Question 84	0 / 1 pts
	What methods, other than accuracy and response time, do investigators use to study mental	processes?
	O hand movements	
	O running speed	
Correct Answer	O brain visualization measures	
	O driving skill	
Unanswered	Question 85	0 / 1 pts
	What is the drawback to most methods that researchers use to measure cognitive processing	g?
	O Because of technology, human cognition is changing rapidly, and it is hard for methods to remain	current.
	O Human participants can accurately push buttons for only a few minutes at a time.	
	The participants' stereotypical beliefs interfere with cognition.	
Unanswered	Question 86	0 / 1 pts
	Noam Chomsky suggested that language is learned through behavioral conditioning.	
	O True
